

Ready for Take-Off & LEED Certification

Swinerton Builders has recently completed the new \$36-million Van Nuys Air Operations Facility. New buildings include the Los Angeles Fire Department Administration Building and Hangar, the General Services Department Maintenance Hangar, and the Los Angeles Police Department Hangar.

Also on the 15-acre site are two new 34-foot-high hangars and two two-story office buildings with concrete foundations, masonry walls and steel roof structures. Special features of this project include custom hangar doors, an antenna structure, a tensile membrane structure and metal building systems.

Heavy site work included grading/shoring, site concrete/AC paving, site utilities, landscaping and irrigation.

The Project Team includes: Sam Laham, Raj Ramanathan, Rick Casillas, Brent Haslem, Ray Torres, Lisa Wilson, Matt Egan, Aitan Spring, Robyn Jackson, and Rose Manalastas. Alvin Fuchigami has taken over accounting duties from our dear friend, the late Sharon Allen.
